# Instructions

1. Ensure you've followed the lessons to set up your Github, git, and VS Code
2. Fill in the below tasks (note it'll save as you go)
3. Once everything is filled in, ensure you click "Submit and Export PDF"
4. Upload the PDF to Github in a Module1 folder
5. Find the downloaded PDF and move it into the location of your local repository folder (don't use the Github upload option as we want to practice the git commands)
6. Use `git add .` to track all file changes (i.e., the PDF)
7. Use `git commit -m "Uploading M1 PDF"` to record the change and provide a meaningful message
8. Use `git push origin main` to move the changes to the remote repository's main branch (Note: Future assignments will have a dedicated branch name for their work)
9. Take the same PDF and upload it to the Canvas submission

- Did you learn anything new this module? If so, provide some brief details.
- If both answers were no, briefly explain your prior background.

## ≡ Text Prompt

Your Response:

My prior background in IT was mainly just doing basic troubleshooting at my church, building PCs, setting up printers & routers. I do not have very good background knowledge in Java, just the very basic stuff. I also want to mention that I skipped over CS113 because of dual credits I took in high school.
